

# Welcome to CodexWiki

CodexWiki is a ColdFusion Enterprise Wiki built on [Coldbox](#), [Transfer](#) and [ColdSpring](#). **CodexWiki** is an open source software licensed under the [Apache 2 license](#). It has a powerful syntax that is [mediawiki](#) compliant and interchangeable, with an extensive and documented extension plugin architecture. So you can build your own wiki parsers or wiki plugins to extend the wiki for your own purposes.

**CodexWiki** is a copyright software by [Luis Majano](#) (Ortus Solutions) and [Mark Mandel](#) (Compound Theory)
